

Adobe Connect - Chat Transcript from IDN Variant Issues Project
13 November 2012 conference call

Dennis Jennings: (11/13/2012 05:58) Who was that last speaker /
Zhang Zhoucai: (05:58) Joe, Zhang from China
Dennis Jennings: (05:59) Joe, the sound was very faint - please speak again
Zhang Zhoucai: (05:59) I am just recovered from a bad cold too.
Daniel Kalchev: (06:01) Can we have audio bridge via Adobe Connect?
IT OPS: (06:01) There is audio via Adobe Connect
Daniel Kalchev: (06:01) I can't connect my microphone, but I do hear you well
Dennis Jennings: (06:01) Daniel - we have that I'm told
IT OPS: (06:01) If you turn up your speakers you can hear it. But if you are on the phone you should mute your computer speakers or there will be echo feedback.
IT OPS: (06:02) That's correct, Dennis.
Michael Everson: (06:03) Hello
Dennis Chang: (06:04) I am taking the notes for the call
Nicoleta Munteanu: (06:04) Hello everyone.
Nicoleta Munteanu: (06:05) If you have any comments or questions that you would like to be expressed or asked in the room, please let me know.
Mirjana: (06:05) If I mute my speaker I cannot hear anything. Any suggestion?
Nicoleta Munteanu: (06:05) Please note that this conference call is being recorded.
Nicoleta Munteanu: (06:05) @Mirjana, did you dial in the call?
P: (06:05) hello everyone. I am at a meeting right now, I cannot talk to the phone, but I'll try to hear and to participate via chat
Mirjana: (06:06) I am using adobe connect
P: (06:06) panagiotis papaspiliopoulos is here - virtually
Daniel Kalchev: (06:06) not yet
Daniel Kalchev: (06:06) i am dialing now
Naela Sarras: (06:07) @Mirjana, don't mute your speakers if you are not using the phone
Yoshiro Yoneya: (06:08) I'm connecting, but my microphone seems not working.
Daniel Kalchev: (06:08) I can't seem to dial in properly "your entry is incorrect (conference number)". So for now I will just listen :)
Nicoleta Munteanu: (06:09) @Daniel, the conf code is 46389
Asmus: (06:11) Positional variants are those that are *only* variants in a given position.
Asmus: (06:14) No
Michael Everson: (06:14) AH.
Yoshiro Yoneya: (06:16) One question, the document says unified LGR changes time to time, I wonder if new unified LGR is applied to existing IDL in root zone?
panagiotis papaspiliopoulos: (06:16) hello everyone. I am at a meeting right now, I cannot talk to the phone, but I'll try to hear and to participate via chat
Asmus: (06:16) a structured -> any specific
Zhang Zhoucai: (06:18) The phone line is disconnected now.

Nicoleta Munteanu: (06:20) Zhang Zhoucai, can you hear us using the Adobe Room?

Chris Dillon: (06:22) Asmus: Is Simplified Chinese an example of a structured series of code points?

Zhang Zhoucai: (06:23) I just want to point out an error in Appedix E, The Chinese example is wrong., U+7231 should be simplified, while the U+611B should be the Traditional. The followed text be revised accordingly.

Dennis Jennings: (06:24) Joe - I actually spotted that ! Thanks

Asmus: (06:25) Chris: until I hear different from Andrew, I'd treat "structured" as an underfined term (and since it's not defined, it may not be needed).

Chris Dillon: (06:26) Thanks. OK. I need to think about that more!

Joseph Yee: (06:27) Regarding B.4.4, the first paragraph, it says that integration panel not free to amend the details of the generation panel's proposal, but it was expected that integration panel may amend variant rules (B.1.2 - rule 3)

Joseph Yee: (06:27) So I think the text needs to clarify what may be amend or not

Dennis Jennings: (06:29) Joseph - thanks

Zhang Zhoucai: (06:30) I have an edirorial comment for the term "varinats", if it implies variant word, not only a character, please add "word" after the "variant".

Asmus: (06:35) Abandoning the Conservatism pirnciple is not called for. And that principle is the one that calls for leaving out anything that can't achieve consensus.

Asmus: (06:36) However, there might be a theoretical issue with obstructionism that is NOT based on technical grounds...

Dennis Jennings: (06:36) Michael - noted

Asmus: (06:38) Agree with Michaels point about handling this kind of extreme problme via panel composition, contract etc.

Asmus: (06:38) Read

Michael Everson: (06:39) Wanton obstructionism on non-technical grounds is something handled by withdrawal of the person's contract.

Michael Everson: (06:40) Isn't that handled by "good practice"?

Dennis Jennings: (06:40) Rinalia - Hand noted

Syed Iftikhar H. Shah: (06:41) Michael , good practice made by whom ?

Asmus: (06:42) There may be a disconnect here - there's the question of whether to add IDN at all, where I think the stance is NOT one to allow "the smallest" number. What DOES need to be limited is the number and complexity of additional rules that apply to the shared ROOT.

Rina: (06:44) Response, pls.

Francisco Arias: (06:46) @Rinalia, we also have the chair of the generation panel. I'd think that the chair of the panel would be a facilitator of the discussion.

Asmus: (06:46) I think the document might strengthen the section on how to administer a primary panel.

Rina: (06:47) @Francisco, I'm thinking worse case scenario. First option Chair, second option advisers, if they are trusted by the group third option other trusted parties. I'm being very practical here.

Francisco Arias: (06:48) @Rinalia, agree the Chair is the first option to resolve disputes

Michael Everson: (06:48) "The advisor can also be called upon to assist in facilitation of dispute resolution where necessary."

Michael Everson: (06:49) What is a "trusted person"? Isn't everyone supposed to be trustworthy and professional? What if the people who are supposed to agree on who is "trusted" can't agree on that person? This becomes endlessly recursive.

Syed Iftikhar H. Shah: (06:50) i am disconnected

Rina: (06:51) In mediation and dispute resolution, Michael, parties in the dispute have to agree on someone that they both agree as someone they trust.

Francisco Arias: (06:52) @Rinalia, I'd think that is the Chair. The Chair of a Generation panel has to be someone trusted by the members of the panel.

Rina: (06:52) Francisco, there may be cases where the Chair is conflicted (i.e., not neutral and siding with one faction).\

Michael Everson: (06:52) I agree with Francisco

Syed Iftikhar H. Shah: (06:53) francisco can you ask telephone operator to call me

Francisco Arias: (06:53) @Syed, you can talk over here

Asmus: (06:53) I don't understand the problem either.

Michael Everson: (06:54) Vangelis, are you concerned that Greek will be delayed by work on Latin and Cyrillic?

Syed Iftikhar H. Shah: (06:54) i was on the line, just a minute before disconnected

Francisco Arias: (06:55) @Syed, you can hear and talk over Adobe Connect

Francisco Arias: (06:55) no need to use phone :-)

Andrew Sullivan: (06:55) called back

Andrew Sullivan: (06:55) sorry, got disconnected

Naela Sarras: (06:57) @Syed Iftikhar, Dennis is now wrapping up the call. For the call in two weeks, please email your phone number and we will arrange for the operator to call you.

Joseph Yee: (06:57) no

Zhang Zhoucai: (06:57) No.

Yoshiro Yoneya: (06:57) no at this moment

panagiotis papaspiliopoulos: (06:58) hi Dennis!

panagiotis papaspiliopoulos: (06:58) bye Dennis! ;)

Mirjana: (06:58) Bye

Nicoleta Munteanu: (06:59) Thank you for participating in this call.

Nicoleta Munteanu: (06:59) Audio recording and Chat questions and comments for this session will be available at: <https://community.icann.org/display/VIP/Meeting+Minutes>

Asmus: (06:59) Bye.\

Yoshiro Yoneya: (06:59) thank you, and good bye!

panagiotis papaspiliopoulos: (06:59) bye

Dennis Chang: (06:59) good bye

Rina: (06:59) Thanks.

Joseph Yee: (06:59) bye

Syed Iftikhar H. Shah: (06:59) good by
